*Kiselis Contemporary Art* is a mixture of abstract, imagery and illusion art...similar to abstract expressionism of deKoonig, Rothko, Pollock, as well as Miro & Chagall. A technique he calls "*Focuicism*" (fo-kway-ism)... simple yet provocative! Mr. Kiselis encourages the viewer to "*focus*" on the images that are subtly immersed in the background.

The use of primary colors, only, on many paintings catches the viewer's eye immediately, however, the story behind each painting gives it a "special" visual banquet. Many of the artworks champion the spirit of Mark Kiselis...they reflect his witty attitude on life and give insight into his imagination and dreams.

For the past 30 years Mr. Kiselis has "*focused*" on pen/ink, poetry and painting. His broad range of talent has exceeded even his own expectations. Mr. Kiselis, with over 400 paintings to date, is unique, dynamic and constantly evolving. His evolution in technique and design has established himself as truly one of the most exciting contemporary artists in America.
